Explanations of policies for each "yes" checked above:							

For the crisis program a household must meet the vulnerbility policy: To be eligible, a household must be vulnerable at the time of application. A household is vulnerable if it has a heating source billed separately and it is subject to the rising cost of heating for the heat expense. Accept the applicant's statement about the vulnerability status for the household. 1. If a household lives in a private living arrangement with a heating source and heat costs are billed separately, it is fully vulnerable. 2. If a household lives in public housing where heat costs are billed separately from the rent, it is fully vulnerable. 3. An applicant who lives in a private living arrangement who does not receive a separate bill from the energy provider, they are not vulnerable. 4. A household living in public housing where utilities for heat are billed separately from the rent, and the household has paid an excess in utilities for heat at 12 months at the current address, is fully vulnerable. County needs to have the public housing/housing authority sign a vendor contract for the payment check to be written to them directly or the public housing authority needs to provide the account number for the household applying for benefits. For additional verification of a heating arrangement in public housing, contact the local public housing authority. 5. A person living in an institution is not vulnerable.

Section 10: Program, Fiscal Monitoring, and Audit, 2605(b)(10)

10.1. How do you ensure good fiscal accounting and tracking of funds?

North Carolina Division of Social Services operates under a county administered and state supervised system. Both State and County administrative costs of direct case work are charged directly to the appropriate program and supervisory and overhead cost are allocated in accordance with the cost allocation plan approved by the North Carolina Department of Health and Human Services. NC DHHS fiscal/budget Division tracks in house and subgrantees and administrative cost. Indirect cost are handled through cognizant agencies prior to the final direct cost rate being developed. Expenditures on all components of the LIHEAP plan are recorded in the North Carolina Division of Social Services accounting records by fund, cost center, and line item. Documentation of State office expenditures are maintained by the accounting office. Applications for heating, cooling, and crisis programs are taken by Department of Social Services personnel and additonal State and local government entitles or community based organizations. The applications are processed by the county and are retained by the county. Local State monitoring is conducted to track the LIHEAP funds used and the number of households that received assistance.

LOW INCOME HOME ENERGY ASSISTANCE PROGRAM(LIHEAP) MODEL PLAN Section 16 - Performance Goals and Measures

Section 16: Performance Goals and Measures, 2605(b) - Required for States Only

16.1 Describe your progress toward meeting the data collection and reporting requirements of the four required LIHEAP (Benefit Targeting Index, Burden Reduction Targeting Index, Restoration of Home Energy Service, and Prevention of Loss of Home Energy Service). Include timeframes and plans for meeting these requirements and what you believe will be accomplished in the coming federal fiscal year.

North Carolina Energy Programs Application is currently on target to capture the data needed for the required performance measures data. Continuous work been done to ensure improvements are made in this area. Vendor agreements are reviewed to ensure areas have been updated to strengthen partnerships between the local DSS agencies and the vendors. Top vendors in each category have been identified for reporting purposes. North Carolina will collect main heating fuel information and cooling information from all households assisted by gathering information from the application process and North Carolina will pull the information for reporting from the NC FAST system. The NC FAST system requires that all information is entered to obtain expenditure data for all LIHEAP bill payments to households. We identify the top providers and send them a list of all clients for the vendors to return the last 12 months of bill data.

If any of the above questions require further explanation or clarification that could not be made in the fields provided, attach a document with said explanation here.
