LOW INCOME HOME ENERGY ASSISTANCE PROGRAM(LIHEAP) MODEL PLAN Section 4 - Crisis Assistance

Section 4: CRISIS ASSISTANCE

Eligibility - 2604(c), 2605(c)(1)(A)

4.1 Designate the income eligibility threshold used for the crisis component

Add	Household size	Eligibility Guideline	Eligibility Threshold
1	All Household Sizes	HHS Poverty Guidelines	150.00%

4.2 Provide your LIHEAP program's definition for determining a crisis.

If you administer multiple crisis assistance programs (winter, summer, and/or year-round), Include all program definitions.

When a household is at risk of losing their heat source—whether due to lack of fuel, harsh winter conditions, or having no other source of heat or energy in the home—it’s essential to know that there are support systems in place to help. If they have already received regular heating assistance, they may be eligible to apply for crisis assistance. However, it’s important to note that regular heating assistance must be utilized before crisis assistance can be accessed.

In cases where the heating bill is exceptionally high, households have the option to apply for both regular heating assistance and crisis assistance simultaneously. This dual application can provide much-needed relief and ensure that the household remains warm and safe during the winter months. Remember, seeking help early and understanding the available resources can make a significant difference in managing heating costs and safeguarding the well-being of everyone in the home.

4.3 What constitutes a life-threatening crisis?

When power is shut off in a household, it can create or aggravate several medical conditions, especially if the shutoff occurs during extreme weather conditions. Here are some examples of how a power outage can impact a household member's health, taking into account the month, temperature, source of fuel, and available resources:

1. Respiratory Conditions (e.g., Asthma, COPD):

- **Summer:** High temperatures and humidity can aggravate respiratory conditions. Without air conditioning, individuals with asthma or COPD may find it difficult to breathe due to poor air quality and increased pollen levels.
- **Winter:** Cold temperatures can trigger asthma attacks and exacerbate COPD symptoms. Without heating, the cold air can cause bronchospasms and other respiratory issues.

2. Cardiovascular Conditions (e.g., Hypertension, Heart Disease):

- **Summer:** High temperatures can lead to heat exhaustion or heat stroke, particularly

dangerous for individuals with heart conditions. The stress of heat can increase blood pressure and heart rate.

- **Winter:** Cold temperatures can cause blood vessels to constrict, raising blood pressure and putting additional strain on the heart. Lack of heating can increase the risk of heart attacks.

3. **Diabetes:**

- **Summer and Winter:** Insulin and other medications may require refrigeration. A power outage can compromise the effectiveness of these medications, leading to poor blood sugar control and potential health crises.

4. **Chronic Pain and Arthritis:**

- **Summer:** Dehydration and heat can exacerbate chronic pain conditions.
- **Winter:** Cold weather can increase joint stiffness and pain, making it difficult for individuals with arthritis to move around. Lack of heating can make these symptoms worse.

5. **Mental Health Conditions (e.g., Anxiety, Depression):**

- **Summer and Winter:** The stress of a power outage, combined with extreme temperatures, can worsen symptoms of anxiety and depression. Lack of light and heating/cooling can contribute to feelings of isolation and discomfort.

Considerations:

- **Month and Temperature:** The specific month and temperature play a crucial role. For example, in July (summer), high temperatures may lead to heat-related illnesses, while in January (winter), low temperatures may cause hypothermia and other cold-related health issues.
- **Source of Fuel:** Households relying on electric heating and cooling systems are particularly vulnerable. Fuel sources like gas or propane for stoves or heaters might mitigate some issues but still pose risks if not used safely.
- **Resources:** Access to backup generators, community cooling or warming centers, and emergency medical services can influence the severity of the impact. Households with limited resources may face greater health risks during a power outage.

Other local service providers maintain effective communication with the Nez Perce Tribe Social Services to verify and seek resources for applicants. State TAFI service providers, as well as Community Service Providers in local schools, also coordinate with tribal social services to address the needs of applicants. Tribal TANF, Nez Perce tribal housing, and other tribal programs work closely with the tribal LIHEAP program.

Our office is conveniently located alongside TANF, Veteran Services, Adult Protection, CPS, and the Domestic Violence Outreach Program, ensuring seamless collaboration. Additionally, we share a location with the Head Start Program, further facilitating coordinated efforts to support our community.

Section 9 - Energy Suppliers**

Section 9: Energy Suppliers, 2605(b)(7) - Assurance 7

9.1 Do you make payments directly to home energy suppliers?

Heating Yes No

Cooling Yes No

Crisis Yes No

Are there exceptions? Yes No

If yes, Describe.

All payments are made to the vendor directly.

9.2 How do you notify the client of the amount of assistance paid?

Decision letters are mailed to each applicant, stating the decision and the amount paid directly to the vendor, within 20 days. Crisis assistance applications will receive notification within 48 hours. In the event of a life-threatening crisis, the eligible household will be notified within 18 hours, detailing the assistance provided.

9.3 How do you assure that the home energy supplier will charge the eligible household, in the normal billing process, the difference between the actual cost of the home energy and the amount of the payment?

We have established comprehensive agreements with all our vendors, fostering close collaboration to ensure our clients' energy needs are consistently met. Importantly, we have not encountered any issues with our vendors charging LIHEAP participants higher rates. Our vendors consistently provide kind and respectful customer service to both the Nez Perce Tribe and our clients.

9.4 How do you assure that no household receiving assistance under this title will be treated adversely because of their receipt of LIHEAP assistance?

Our vendor agreements explicitly state that clients who are LIHEAP recipients will not be treated differently or charged more compared to other customers. These agreements ensure that all clients receive fair and equal treatment regardless of their participation in the LIHEAP program.

It is essential to maintain ongoing communication with both the vendor and the grant recipients. This includes remaining professional and timely with payments that have been pledged. Clear and consistent communication helps in managing expectations and ensuring smooth transactions.

Typically, by the time our clients approach us, they have accumulated high energy bills. It's important to note that the vendor is not aware of which customers will apply for

LIHEAP assistance and therefore sets energy prices uniformly for all customers.

9.5. Do you make payments contingent on unregulated vendors taking appropriate measures to alleviate the energy burdens of eligible households?

Yes No

If so, describe the measures unregulated vendors may take.

Attach a copy of the template statewide vendor agreement or a policy that indicates local agreements must adhere to statewide policies and assurances.

If any of the above questions require further explanation or clarification that could not be made in the fields provided, attach a document with said explanation here.

Section 10 - Program, Fiscal Monitoring, and Audit, 2605(b)(10) - Assurance 10

August 1987, revised 05/92, 02/95, 03/96, 12/98, 11/01
OMB Clearance No.: 0970-013
Expiration Date: 02/28/2027

**LOW INCOME HOME ENERGY ASSISTANCE PROGRAM(LIHEAP)
MODEL PLAN
Section 10 - Program, Fiscal Monitoring, and Audit**

Section 10: Program, Fiscal Monitoring, and Audit, 2605(b)(10)

10.1. How do you ensure good fiscal accounting and tracking of funds?

The Nez Perce Tribe's Social Services and Finance departments collaborate to provide essential accounting services, fiscal control, and fund accounting procedures for benefit payments. To ensure the integrity of the process, applicants must submit documentation such as energy bills and fuel invoices with their application.

Once the application is received, the Social Services department contacts the vendor to verify the validity of these documents. The Social Services Intake Services Director or their designee then reviews the application to determine eligibility. If the application is approved, the Finance department issues a check for the approved benefit amount, and the applicant's energy account number is indicated on the check payable to the vendor. The Intake Services Director ensures checks and balances by reconciling each block of approved applicants with monthly financial printouts.

In cases where the tribe receives a refund from an energy supplier, the refund is documented and returned to the account specified for the Low Income Home Energy Assistance Program (LIHEAP). The LIHEAP funds are meticulously managed, with an accountant itemizing the budget once the funds are received. Each fiscal year, a new account is established for LIHEAP, featuring line items that detail the fund's allocation. This structured approach ensures transparency and proper management of the resources.

10.1a Provide your definitions of the following:

Obligation

Obligated funds refer to money that has been set aside or allocated for a particular purpose or recipient. In the context of households, obligated funds are allocated to those who have completed an application process and have been deemed eligible to receive the funds.

Expenditures

Expenditures are funds that have already been processed and spent

Expenditure timeframe

All payments are processed within 10 days of approved application.

Administrative costs

Administration costs for managing the Low Income Home Energy Assistance Program

(LIHEAP) grant encompass a variety of essential expenses. These costs are necessary to ensure the smooth and efficient operation of the program, which aims to assist low-income households in meeting their immediate home energy needs. Here are the primary components of these administration costs:

1. **Wages:** This includes a percentages of the salaries and benefits of employees who are directly involved in the administration of the LIHEAP grant. These individuals may be responsible for tasks such as processing applications, conducting eligibility assessments, managing program funds, and providing customer service to applicants.
2. **Supplies:** Administrative supplies are the materials necessary for the day-to-day operations of the program. This can include office supplies like paper, pens, and computer equipment, as well as any other materials needed to manage the grant effectively.
3. **Indirect Costs:** Indirect costs are those that are not directly attributable to a specific project or activity but are necessary for the overall administration of the program.

By covering these administration costs, the LIHEAP grant can be managed effectively, ensuring that assistance reaches those who need it most. Proper management of these funds is crucial in maintaining the integrity and effectiveness of the program, ultimately helping low-income households stay safe and warm.

Audit Process

10.2. Is your LIHEAP program audited annually under the Single Audit Act and OMB Circular A - 133?

Yes No

10.2a - if yes, describe your auditor selection process.

The auditors are selected by our tribal leadership

10.3. Describe any audit findings of the grant recipient (i.e. State/Tribe/Territory) rising to the level of material weakness or reportable condition cited in the single audits, inspector general reviews, or other government agency reviews from the most recently audited fiscal year.

LOW INCOME HOME ENERGY ASSISTANCE PROGRAM(LIHEAP) MODEL PLAN Section 13 - Reduction of Home Energy Needs

Section 13: Reduction of home energy needs, 2605(b)(16) - Assurance 16

13.1 Describe how you use LIHEAP funds to provide services that encourage and enable households to reduce their home energy needs and thereby the need for energy assistance?

Applicants receive an energy savings tip sheet with education on how to conserve and save energy in their homes. Avista Utilities, one of the main vendors, provides education and training to clients on energy conservation. They also include handouts with energy-saving tips in every monthly bill and participate in our tribal annual housing fair.

13.2 How do you ensure that you don't use more than 5% of your LIHEAP funds for these activities?

Our activities primarily include resource and referral coordination with community partners, as well as making phone calls to vendors during the pledge process and verifying eligibility. Additionally, our finance department provides us with a detailed monthly report that includes a breakdown of money spent and available funds.

By collaborating closely with community partners, we ensure that the resources are allocated effectively and efficiently to those in need. The phone calls to vendors are an essential part of our process, allowing us to confirm pledges and verify that all requirements for eligibility are met.

The monthly financial reports from our finance department are crucial. They provide us with an up-to-date overview of our financial status, helping us to manage our budget responsibly and plan for future activities.

13.3 Describe the impact of such activities on the number of households served in the previous federal Fiscal Year.

This past fiscal year has shown remarkable progress in our community's management of energy bills and budgeting. We are pleased to report that our resources lasted longer than usual, thanks to our clients' proactive approach in keeping up with their energy expenses.

A significant contributor to this success has been the budgeting classes offered by the Nez Perce Tribal Housing Authority. These classes have equipped our clients with the skills to prioritize their spending, ensuring essential bills are paid before discretionary activities.

Additionally, our community's housing fair has been an invaluable resource. At the fair, energy companies provide crucial information on energy savings, including the distribution of energy-saving light bulbs and other materials. These resources offer

practical tips to help lower heating costs.

We strongly encourage all clients to participate in these events and take advantage of the opportunities to gain further knowledge and tools for better financial management.

13.4 Describe the level of direct benefits provided to those households in the previous federal Fiscal Year.

N/A

13.5 How many households received these services? 349
