- If the customer does not use gas service for heating and the balance owed for service provided is less than \$125;
- If the customer has electric, gas, or steam heat, the utility may not disconnect service if the balance owed for service provided is less than \$450.

Utilities must seek public utilities commission approval before disconnecting the service of residential customers known to be 65 years or older and customers with a known financial hardship.

If customers think they qualify for financial hardship status as defined below, they are told to contact their utility for further assistance.

Section Puc 1202.10 "Financial hardship" means a residential customer has provided the utility with evidence of current enrollment of the customer or the customer's household in the Low Income Home Energy Assistance Program, the Electric Assistance Program, the Neighbor Helping Neighbor Program, the Link-Up and Lifeline Telephone Assistance Programs, their successor programs or any other federal, state or local government program or government funded program of any social service agency which provides financial assistance or subsidy assistance for low income households based upon a written determination of household financial eligibility.

In addition to the protections described above, no residential customer of a regulated utility can be disconnected during the winter period for non-payment of a deposit or portion of a deposit.

Section 9: Energy Suppliers, 2605(b)(7) - Assurance 7

9.1 Do you make payments directly to home energy suppliers?

Heating Yes No

Cooling Yes No

Crisis Yes No

Are there exceptions? Yes No

If yes, Describe.

Payments can be made directly to the client when the client rents with heat included and the landlord refuses to participate in the program. The direct client payment process requires written documentation of the paid rent or energy expense and written approval by OEP.

9.2 How do you notify the client of the amount of assistance paid?

Written notification of eligibility or denial must be sent to the applicant within thirty (30) days of certification. When a household is determined eligible for a FAP benefit, an authorization letter is mailed to the client and a letter of credit is mailed to the client's vendor. When a household is denied a FAP benefit, a denial letter and a Fair Hearing Notice are mailed to the applicant.

9.3 How do you assure that the home energy supplier will charge the eligible household, in the normal billing process, the difference between the actual cost of the home energy and the amount of the payment?

All participating vendors agree to the following language in the vendor agreement:

"The Supplier will charge the eligible household, in the normal billing process, the difference between the actual cost of the home energy and the amount of the payment made by the State of New Hampshire or its subgrantee" is part of the vendor agreement, signed by the vendor and the CAA. The amount of the FAP payment and any remaining balance on the account is listed on the customer's monthly billing statement.

9.4 How do you assure that no household receiving assistance under this title will be treated adversely because of their receipt of LIHEAP assistance?

All participating vendors agree to the following language in the vendor agreement:

"The Supplier shall not advertise in a manner that implies that LIHEAP assistance is available only through the Supplier, or that LIHEAP applications are taken by the Supplier, or that in any other way misleads the public about LIHEAP.

The Supplier will assure that no households will be treated adversely because of such assistance under applicable provisions of New Hampshire Law or any other regulatory requirements (U.S.C. 8624 (b)(7)(C)). The Supplier will not discriminate in either the cost of goods or services provided against any Fuel Assistance Program household on whose behalf the State of New Hampshire or its agents make payments. The Supplier also agrees to respect the confidentiality of those households participating in the Fuel Assistance Program."

9.5. Do you make payments contingent on unregulated vendors taking appropriate measures to alleviate the energy burdens of eligible households?

Yes No

If so, describe the measures unregulated vendors may take.

The CAA makes a payment to a participating vendor after the fuel has been delivered to the certified eligible household and documentation of the delivery has been received and reviewed by the CAA.

If any of the above questions require further explanation or clarification that could not be made in the fields provided, attach a document with said explanation here.

LOW INCOME HOME ENERGY ASSISTANCE PROGRAM(LIHEAP) **MODEL PLAN** **SF - 424 - MANDATORY**

Section 10: Program, Fiscal Monitoring, and Audit, 2605(b)(10)

10.1. How do you ensure good fiscal accounting and tracking of LIHEAP funds?

The NH FAP application process, benefit determination and tracking of payments are all completed using a software system specifically designed for the administration of the FAP. OEP has read-only access to each database and report site. The CAAs generate reports and submit reports and signed reimbursement requests to OEP on a weekly basis. Reports and reimbursement requests are reviewed prior to reimbursement authorization.

OEP conducts fiscal monitoring using two separate monitoring tools.

Fiscal monitoring of administrative and Assurance 16 expenses includes verifying the accuracy of reimbursement requests submitted by the subgrantee. A monitoring visit includes a review of the agency's internal controls, financial policies and procedures, compliance with the OMB Super Circular (Uniform Guidance), contract compliance, purchasing and budgeting. A sampling of expenditures is verified from the general ledger to the reimbursement request. Cash receipts, cost allocations and equipment are also sampled.

Each CAA is required to submit a copy of the agency's single audit report to OEP. LIHEAP is considered to be a major program within the single audit.

Application monitoring includes a review of recipient applications and all supporting documentation for program eligibility, verification of signatures and information on energy supplier (vendor) agreements, accuracy of benefit levels, a review the bills sent by the energy supplier to the subgrantee, ensuring that bills are properly calculated, the price is reasonable, that the check sent to the energy supplier is in agreement with the bill, a review of the spenddown of the benefit to the vendor to ensure that the benefit is being utilized appropriately and a review of payments to energy suppliers and reimbursement requests submitted by the subgrantee.

Section 13: Reduction of home energy needs, 2605(b)(16) - Assurance 16

13.1 Describe how you use LIHEAP funds to provide services that encourage and enable households to reduce their home energy needs and thereby the need for energy assistance?

The NH FAP uses Assurance 16 funds to provide self-sufficiency education to all households with fast-tracked crisis applications within a program year to encourage applicants to apply for benefits in a timely manner in order to avoid life-threatening situations and special delivery charges, which deplete the household's benefit. Households receive information on the application process, managing resources, communication with vendors and referrals to other resources.

13.2 How do you ensure that you don't use more than 5% of your LIHEAP funds for these activities?

After the LIHEAP Grant Award is received, OEP calculates the maximum 10% Administrative and maximum 5% Assurance 16 funding levels. Once the maximum for each category has been calculated, OEP contracts with the sub-grantees (4% in PY 17). OEP uses an internal spreadsheet to ensure that payments to the sub-grantees do not exceed the approved and allowable Assurance 16 funding levels.

13.3 Describe the impact of such activities on the number of households served in the previous Federal fiscal year.

The impact of the Assurance 16 activities is a change in the behavior of the households experiencing an energy emergency one year to applying for assistance in a non-emergency situation during the following years. The CAAs reported 1823 households with crisis applications for PY 15. In PY 16, 747 households reduced dependency (received a benefit but were not an emergency in PY 16), 300 households achieved great self-sufficiency (received a lower benefit or were over income for PY 16), 587 households did not apply and 133 households applied as an emergency in PY 16 (these households are referred back into Assurance 16 case management).

13.4 Describe the level of direct benefits provided to those households in the previous Federal fiscal year.

There are no direct Assurance 16 benefits. All benefits are regular FAP assistance.

13.5 How many households applied for these services? 1823

13.6 How many households received these services? 1823

If any of the above questions require further explanation or clarification that could not be made in the fields provided, attach a document with said explanation here.

14.3 For each type of resource and/or benefit to be leveraged in the upcoming year that will meet the requirements of 45 C.F.R. Â§ 96.87(d)(2)(iii), describe the following:

Resource	What is the type of resource or benefit ?	What is the source(s) of the resource ?	How will the resource be integrated and coordinated with LIHEAP?
1	Neighbor Helping Neighbor	Donations made by customers of Eversource, Liberty, and Unitil.	Benefits were available to clients in a crisis situation with an active disconnect from their utility who were denied LIHEAP assistance.
2	NH Electric Cooperative Project Care	Donations contributed by members of the New Hampshire Electric Cooperative.	Benefits were available to clients whose LIHEAP benefits were not sufficient to alleviate a crisis situation with an active NH Electric Coop disconnection notice. Applications for Project Care are completed by the Community Action Agency staff.
3	New Hampshire Electric Assistance Program	The source of the resource is the system benefit charge (@\$.0018) paid by all all New Hampshire electric customers.	LIHEAP representatives from the NH Office of Energy and Planning have been involved in the development, implementation and ongoing evaluation of the Electric Energy Assistance Program.
4	NH Town/City Municipal Welfare Assistance	Assistance that is provided by cities and towns to purchase heating fuels and to pay electric bills.	Persons seeking assistance with fuel or utilities are directly referred to municipal welfare officials by LIHEAP personnel in the field.
5	Vendor discounts for LIHEAP purchases	Fuel vendors	Program was developed by the State of New Hampshire and TCCA in the mid 1980s; each year we negotiate with each vendor leading to a vendor agreement addressing discounts.
6	Utility rate payer funded weatherization services	NH Electric COOP, Liberty, Unitil and Eversource, funded by the system benefit charge.	Recipients of program are determined by process parallel to LIHEAP application process; program is administered by LIHEAP/WXN staff as part of regular operations; State LIHEAP and Community Action Agencies participated in development/implementation of program.
7	Donations to LIHEAP	Donations to LIHEAP from the faith community, businesses and individuals.	The Community Action Agencies work actively in the community to secure donations for fuel and utility needs not met by LIHEAP funding.

LOW INCOME HOME ENERGY ASSISTANCE PROGRAM(LIHEAP) MODEL PLAN SF - 424 - MANDATORY

Section 16: Performance Goals and Measures, 2605(b) - Required for States Only

16.1 Describe your progress toward meeting the data collection and reporting requirements of the four required LIHEAP performance measures. Include timeframes and plans for meeting these requirements and what you believe will be accomplished in the coming federal fiscal year.

1. Benefit Targeting Index for High Burden Households - measures the extent to which the highest benefits are provided to the LIHEAP recipient households with the highest energy burden¹¹ (the percent of gross income spent on utility costs);

1. NH is currently using a 15 year old software system that does not currently compute energy burden for households. The NH FAP software calculates the heating burden and the NH Electric Assistance Program calculates the electricity burden but the two are not calculated together. NH is in the process of developing an RFP for new new software but it will not be available for PY 17. NH will use a combination of the current software and manual procedures to provide the required information in PY 17.

2. Energy Burden Reduction Index for High Burden Households - measures the extent to which LIHEAP benefits are adequate to deliver the same energy burden reduction to high burden recipient households as to low and moderate burden recipient households;

2. The NH software is currently able to measure annual heating costs compared to the LIHEAP benefit but it is not able to measure full home energy costs. See response to question #1 above.

3. Prevention of Loss of Home Energy Services - the unduplicated count of households where LIHEAP prevented the loss of home energy services; and

3. Beginning in PY 15, NH implemented a deliverable fuel priority application period beginning September 1. No and Low Fuel households are prioritized for certification in order to prevent emergencies when the program opens on December 1. A reporting tool was added to the FAP software for PY 16, enabled the CAAs and the state to identify and count the households in these categories for prevention and restoration purposes.

4. Restoration of Home Energy Services - the unduplicated count of households where LIHEAP restored home energy services to the client.

4. These households are tracked through the NH Assurance 16 emergency program and data is available for reporting purposes.
