When extreme temperatures are experienced within the State, utility companies providing services will not disconnect services until the extreme temperatures have ended. For example, temperatures at freezing and below 0 - heating companies usually will not disconnect the services for non-payment until the temperatures have returned to above freezing levels for at least 24 hours. For cooling season, utility companies within the state usually will not disconnect service while temperature indexes are 100 degrees are higher for at least 24hours. This is in effect by most municipalities or regions within the service area of that utility based on National Weather SErvice predictions.

LOW INCOME HOME ENERGY ASSISTANCE PROGRAM(LIHEAP) MODEL PLAN SF - 424 - MANDATORY

Section 13: Reduction of home energy needs, 2605(b)(16) - Assurance 16

13.1 Describe how you use LIHEAP funds to provide services that encourage and enable households to reduce their home energy needs and thereby the need for energy assistance?

Provide energy reduction tips, pamplets, and devices that can minimize energy consumption. Offer utility payment incentives for attending the education classes.

13.2 How do you ensure that you don't use more than 5% of your LIHEAP funds for these activities?

Budget process, internal fiscal controls. Accounting procedures and computer program tracks expenditures against budget with hard stop if budgeted amount would be exceeded.

13.3 Describe the impact of such activities on the number of households served in the previous Federal fiscal year.

Measurement of the impact is difficult. However, as families have received energy reducing items as incentives for participation, we have seen households return to request more CFL light bulbs because they saw the value. When attending the Educational classes, participants have provided verbal testimony to others how they have used the tips or incentive items to lower their energy usage.

13.4 Describe the level ofdirect benefitsprovided to those households in the previous Federal fiscal year.

Education Classes were held in the HEating season, and again in the Cooling season. Participant Households recieve \$100 incentive paid to their respective utility company for attending and participating in the class. People who do not attend the full class are not eligible.

In the Heating Season 106 Households received the \$100 incentive but 108 households attended. 158 households signed up for the class. The actual number of people who attended and received the education is higher. We only counted the households represented. All Household received a package of CFL light bulbs or other small energy saving item; therefore we are including the full number of households in this reporting line.

IN the Cooling Season 137 Households received the \$100 incentive but 197 households attended; 240 households signed up for the class. Again, the actual number of people who attended and received the education is higher. We only counted the households represented. All Household received a package of CFL light bulbs or other small energy saving item; therefore we are including the full number of households in this reporting line.

13.5 How many households applied for these services? 398

13.6 How many households received these services? 305
