HEAP. The household cannot be pre-authorized to both Winter and Summer program per fiscal year to ensure LIHEAP capture any change of household circumstance that might not pertain to other DHS benefit since LIHEAP does not have mid year certification review. The preauthorized household's inco me eligibility is established through system logic with the income from other benefit section(s) on their active open case that has been reported, verified, a nd recorded. These preauthorized household rights to request for fair hearing. 1.6 How do you ensure there is no difference in the treatment of categorically eligible households from those not receiving other public assistance when determining eligibility and benefit amounts? We do not have categorical eligibility guidelines for SNAP are higher than LIHEAP, so some SNAP households do not qualify for LIHEAP. P. However, if the payee is receiving TANF, SNAP, or SSP and other household members are not included in those benefits, income must be verified for all other programs. 	DHS uses gross income for determinate LIHEAP eligibility as seen in Appendix C-7 for Income Eligibility. DHS also allows certain deductions according to Oklahoma Administrative Codes for greater benefit amount payout during heating and cooling season as seen in A ppendix C-7-A for Benefit Matrix. DHS calculates the net income as follows:
	Gross income - allowable deductions = countable net income. The countable net income is the income to be used to determine how much LIHEAP benefit amount household would be eligible base on the household size, countable net income, and type of fuel.
	Gross income is used for household income eligibility. The household's gross income that must be within 130% of FPG for LIHEAP eligibility. Household must met gross income eligibility threshold first before LIHEAP benefit amount could be determined by using counta ble net income for a larger benefit allotment.

Explanations of policies for each "yes" checked above:

Oklahoma has a liquid resource limit for LIHEAP households. This includes bank accounts, cash on hand, CDs, cryptocurrency, and other investments that can be accessed without penalty to the household. Resources are verified when screening of application indicates declaration of r esources is questionable.

Renters, renters with utilities included in rent and renters in subsidized housing receive the same benefit amounts as homeowners. Renters in subsidized housing must be responsible for at least a portion of their heating utility in order to be considered vulnerable. Renters with utilities in cluded in rent must veirify that a specific portion of the rent is for the cost of utilities or be charged for a surcharge amount during high usage mon ths to be considered vulnerable. Applicants that are roomers receive a smaller benefit heating but it is still based on income.

Determination of Benefits 2605(b)(5) - Assurance 5, 2605(c)(1)(B)

2.4 Describe how you prioritize the provision of heating assistance tovulnerable populations, e.g., benefit amounts, early application periods, etc.

Many of our preauthorized households are hosehold with elderly or disabled individuals. DHS sends application to household receiving ot her benefits such as SNAP, TANF, or SSP (State Supplemental Payment to the Aged, Blinded, or Disabled) and accepts these applications priors t o the Open Enrollment date of the program. DHS allows households to apply by online, mail, fax, or phone. If funding is such that we will not be able to have open enrollment for the general population, we will reduce the number of applications and increase mailed application target househo lds that has at least an elderly or disabled or young children.

If you responded "Yes" to question 4.16, you must respond to question 4.17. 4.17 Describe the terms of the moratorium and any special dispensation received by LIHEAP clients during or after the moratorium period.				
Regulated utilities in Oklahoma have a moratorium based on severe weather. If the high temperature is actually or predicted to be at least 3 2 degrees or below on the day of disconnection or the nighttime low is predicted to be 20 degrees or less, the utility will suspend disconnection of service as long as the gas service is used for heating purposes. If the temperature actually is or predicted to be at least 101 degrees with heat index or higher on the day of disconnection, the utility will suspend disconnection.				

One of our largest electric companies has a slightly lower temperature threshold for summer disconnections. They also do not disconnect if the predicted or actual high is 32 degrees or below or nightime is or is predicted to be 20 degrees or below.
