Section 13: Reduction of home energy needs, 2605(b)(16) - Assurance 16

13.1 Describe how you use LIHEAP funds to provide services that encourage and enable households to reduce their home energy needs and thereby the need for energy assistance?

Households having high home energy burdens can be helped through an energy assessment conducted by the local Area Council of Government ("UBAG") which coordinates with the Tribe's weatherization program. UBAG is able to conduct energy audits and with coordination from the Tribe, make modifications and repairs to Tribal homes.

In some years, it is sometimes possible for special energy efficient electric heaters to be purchased through the LIHEAP program for selected homes having high energy needs (using propane or having an especially large area to heat) in order to shift some of the cost of heating to a lower heating source. The heaters are purchased with unexpended funds remaining at the end of the grant year that are re-assigned and obligated for this purpose (if there any unexpended funds in any given Year). This program is strictly a contingency if funds are available and a plan amendement will be prepared and submitted if the situation presents itself.

13.2 How do you ensure that you don't use more than 5% of your LIHEAP funds for these activities?

The program is small enough whereby communication between the UFS LIHEAP Coordinator and Financial Officer is performed reguarly to discuss outstanding issues relating to the program such as funding limitations for different parts of the program.

13.3 Describe the impact of such activities on the number of households served in the previous Federal fiscal year.

13.4 Describe the level of direct benefits provided to those households in the previous Federal fiscal year.
