Young Childre	en?	Yes			
House holds w	House holds with high energy burdens? No				

Priority for receiving service is given to households with the highest energy usage (greatest potential for savings) with additional priority to households occupied by elderly persons, persons with disabilities, and/or young children. The priority system is consistently applied to all housing types, single family, mobile homes, and multi-unit dwellings.

Client selection for service is based on a point system based on an estimate of annual client bill savings for heating, water heating, and air conditioning measures. Additional points are given if any household members are elderly, disabled, or young children.

A household's client point total will be increased by 5 percent for each of the following situations:

- · The household is occupied by an elderly person
- The household is occupied by a person with disabilities
- The household is occupied by young children

(A household's priority point total could be increased by 15 percent if each of the situations listed above exists.)

The audits will be conducted in accordance with the Comptroller General's standards for audit of governmental organizations and programs, by an organization or person independent of agencies administering LIHEAP activities. The audits will be made public on a timely basis. The Auditor of State will submit the audits to the legislature and Department of Health and Human Services within 30 days after completion.

To appeal they must write to the agency at which they applied (see address on your client notice) and tell the agency why they want to appeal, and what action they would like taken

The agency will act on their request and notify them of the result within 7 calendar days of the date they request an appeal (postmark date if sent in mail).

If they still do not agree with the decision reached they may write the agency again within 17 calendar days of the agency's decision date (postmark date if sent in mail) and request that a state hearing be held. Explaining why they disagree with the agency's decision and include any information that might affect the hearing decision.

MODEL PLAN

Section 16: Performance Goals and Measures, 2605(b) - Required for States Only

SF - 424 - MANDATORY

16.1 Describe your progress toward meeting the data collection and reporting requirements of the four required LIHEAP performance measures. Include timeframes and plans for meeting these requirements and what you believe will be accomplished in the coming federal fiscal year.

Restoration of service, Imminent disconnection of service averted, Fuel delivered to empty Tank, Fuel delivered to tank with 20% or less remaining are four requirements we will be collecting at intake and reporting on for the coming federal fiscal year.

Our top 2 electric and gas utilities are MidAmerican and Alliant. Combined they serve 70% of all Iowa LIHEAP recipient households. The only other investor owned utility (gas only) Black Hills Energy serves 10% of Iowa's LIHEAP recipient households. In other words, these 3 utilities serve 80% of all our clients.

80% =approximately 68,398 households. We are working on getting data from these 3 utilities.

That leaves 2 more gas utilities and 3 more electric utilities to round out our top 5 in each category. One municipal utility (Cedar Falls) is on both lists. The remaining gas utility is Liberty and the remaining 2 electric utilities are the cities of Muscatine and Indianola. These 4 (Cedar Falls, Liberty, Muscatine, and Indianola) combined serve 1,125 LIHEAP households. This represents 1.3% of our total clients. Once we have our process in place for the big 3, we will begin to contact these remaining 4 utilities.

While 8,851 or 10.4% of Iowa's LIHEAP households heat with propane, the top 10 propane vendors serve only 2,287 households or 2.6% of our total clients. The number of households that heat with any other bulk fuel is infinitesimal. We will make contact with these 10 and see if they are willing and able to submit data.

That means that based upon the cooperation of our 5 largest gas and our 5 largest electric and our 10 largest propane vendors, we ideally might be able to get data on approximately 83.9% of Iowa's LIHEAP recipient households. The rest of our clients are served by hundreds of small propane vendors, rural electric cooperatives, and small municipal utilities. We are currently working on a plan to at least try and collect what we can and will continue to work on this going forward.

Sections 76.630(c) and (d)(2) and 76.645(a)(1) and (b) provide that a Federal agency may designate a central receipt point for STATE-WIDE AND STATE AGENCY-WIDE certifications, and for notification of criminal drug convictions.
