16.1 Describe your progress toward meeting the data collection and reporting requirements of the four required LIHEAP performance measures. Include timeframes and plans for meeting these requirements and what you believe will be accomplished in the coming federal fiscal year.

State and subgrantees utilize a web-based database (FACSPro) that collects client data at time of intake. Currently, we can report on the unduplicated number of assisted households by fuel type as well as restoration and prevention of loss of home energy service by fuel type. FY 2015 LIHEAP applications were revised to include client waiver language to collect energy expenditure data. In addition, FY 2015 vendor agreements were revised to include language regarding the collection of energy expenditure data. We intend to review and revise as necessary the client waiver language for the FY 2016 applications and vendor agreements to begin collecting energy usage data. We have established an FTP server dedicated for the data transfer and will be conducting a pilot test next month with Alabama Power, our largest electric vendor. We anticipate collecting expenditure data from our top five electric vendors and top five natural gas vendors during the last quarter of 2015. The data will be pushed to FACSPro so we can report on performance measures for FY 2015.
